

THE AFGHANISTAN RECONSTRUCTION TRUST FUND

Guidance Notes Series:

ARTF Results Reporting

ARTF results reporting is outlined in ARTF Results Management Framework. It can be organized in two categories: Government reporting and ARTF reporting provided by the Bank:

3.1 Government of Afghanistan's Results Reporting Mechanisms:

At the project level, the Government of Afghanistan is responsible for reporting to: i) donors on project implementation progress; and ii) the Bank on the utilization of project funds and the status of project implementation progress.

3.2 ARTF's Results Reporting Mechanisms:

Both, ARTF projects results and ARTF performance are reported to key stakeholders through a number of different mechanisms outlined in the ARTF Results Management Framework.

Below some of the key ARTF results reporting mechanisms:

Examples of Ministry results reporting mechanisms:

- Quarterly, Monthly and weekly reports on the National Solidarity Program (NSP) available in the [Ministry of Rural Rehabilitation and Development Website](#).
- Aide Memoires, Newsletters and multimedia on EQUIP, available in the [Ministry of Education Website](#).
- Health- related surveillance updates and reports, available in the [Ministry of Public Health Website](#).
- Agriculture prospect reports available in the [Ministry of agriculture, irrigation and livestock website](#).

- **The ARTF Scorecard is an annual publication of an integrated results and performance framework, which is organized in a four-pillar structure that groups indicators along the results chain. Two of the pillars track elements of development results, and the other two pillars capture elements of performance of the ARTF and the ARTF Administrator.**
- **The ARTF Results Matrix provides an overview of the ARTF portfolio. It lays out the planning hierarchy and links between the Afghan National Priorities and the ARTF portfolio. The Matrix provides the implementation progress and flow: from inputs (ARTF financing and projects) to milestones/outputs to outcomes and indicators.**
- **The ARTF Financial Status Report provides a monthly summary of the overall financial status of the ARTF resources provided by all donors. This includes donor pledges, contributions received, disbursements, undisbursed balances, a summary of portfolio of projects financed through ARTF and the utilization of funds under the Recurrent Cost Window.**
- **The ARTF Bi-Annual and Annual Reports to Donors provide an overview of the utilization of ARTF resources and implementation progress of projects financed through ARTF. These comprehensive reports include updates on main achievements, financial activities, project highlights, and updates from the ARTF Steering Committee and the Monitoring and Supervisory Agents.**
- **The ARTF at Work - Project Results Stories complement quantitative results by including storytelling and testimonials highlighting a particular project, sector or theme.**

The above tools are available at www.artf.af
